WG on Certification

WG on Management of Pilot Projects

WG on Mechanization

WG on Productivity Best Practices

Joint efforts with NEA

- SCIC Regulatory Affairs Committee
- SCIC Energy Conservation Act (ECA) WG
- SCIC Major Hazards Installation (MHI) Committee
- National Chemical Management & GHS Task Force
- Chemical Standards Committee managed by Standards Development Organisation @ SCIC
 - TC for Chemicals and Processes
 - WG on CP 32 : Code of practice for the transportation and storage of pesticides
 - WG on Fast Moving Consumer Goods (FMCG)
 - WG on SS 586 : Specification for hazard communication for hazardous chemicals and dangerous goods
 - TC for Nanotechnology
 - TC for Petroleum Processes and Products
 - WG on Pipeline Service Corridors

Our Activities - Government

Singapore Competent Authorities on Chemical Management

Several agencies which regulates hazardous chemicals with specific inherent properties and at different stages of their life cycle.

The **Ministry of Manpower (MOM)** regulates the exposure to chemicals at workplaces.

The **National Environment Agency (NEA)** regulates hazardous substances which are highly toxic and/or generates toxic wastes.

Singapore Civil Defence Force (SCDF) regulates the storing and transportation of flammable materials including petroleum.

Singapore Police Force (SPF) regulates the manufacture and storage of explosive precursors.

Our Activities - Government

Engagement with Government Agencies

SCIC represents the industry in pro-actively engaging the Government Agencies on advocacy issues affecting the Energy and Chemicals cluster. These were accomplished through various initiatives undertaken with the relevant government agencies.

- Dialogue Sessions
- Feedback Platforms
- Joint Government-Industry Workgroups
- Government-Industry Consultation Sessions
- Joint Seminars
- Capacity building for regulators
- Joint Government-Industry Collaboration Schemes
- Co-development of standards and regulations
- Participation in advisory committees of government agencies

Our Activities – Engagement with Government – *Industry Consultations*

- **Address and resolve advocacy issues through close industry consultations with Government Agencies**
- **Outcomes from joint efforts would be beneficial and conducive for both Government and Industry**

Thank You
